

The JLG logo is displayed in white, bold, italicized letters on an orange, diamond-shaped background in the upper left corner of the image.

**JLG® Electric
Powered Aerial
Work Platforms**

Ready to Work Overtime.

Experience the benefits of reduced charging time and longer runtime with ES Series scissor lifts. You can stay on the job longer, getting more work done in one day. And the optional application-specific accessory packages enhance productivity.

With only two hoses and four fittings, you're working with a cleaner machine that decreases scheduled service requirements and reduces the chance for leaks.

Up to 1,000 lb capacity, proportional controls for ease of operation and optional accessory packages give you exactly what you need to get the job done.

"I'm always impressed with how much runtime we get before recharging."

Dual Capacity

The 2630ES and 3246ES are rated for dual capacity. Restricted capacity on the 2630ES is 500 lb, and unrestricted is 800 lb. The 3246ES features 700 lb restricted and 1,000 lb unrestricted capacity.

Narrow or Wide Platforms

The 1930ES, 2030ES and 2630ES feature 30-inch narrow platforms for access through standard doorways. The 2646ES and 3246ES provide a 46-inch platform for more worker tools or supplies.

ES SERIES

Longer runtime

On a single charge, the electric drive delivers more than double the battery life of hydraulic drive machines.

One-Handed Operation

Fully proportional drive and lift control is smoother and more efficient.

Raising Your Uptime.

From commercial construction to hospitals, schools and facilities maintenance applications, the RS Series can be used virtually anywhere there's work to be done.

Available in two models, the 1932RS features up to 19 ft platform height and 500 lb capacity and the 3248RS has up to 32 ft of platform height and 705 lb capacity.

The ruggedness of the RS Series makes these machines extremely reliable. And its industry-leading duty cycles provide the advantage of longer runtime. The RS Series has the value you need without sacrificing performance and quality.

Low Cost of Ownership

No moving parts to repair or replace in the passive pothole protection system, and leak points are minimized with a design that includes 4 hydraulic hoses.

Extremely Mobile

Innovative operator controls, similar to the ES Series, and compact dimensions enable travel through doorways.

3248RS

1932RS

RS SERIES

25% Gradeability

Both models have the ability to load without assistance and

On-Board MDI Display

The Multifunction Digital Indicator simplifies battery evaluation and fault diagnosis.

Outstanding Performance, On Slab and Off.

Handle a wide variety of terrain indoors and out, without noise and fumes thanks to the quiet operation and zero emissions of the LE Series. With the standard oscillating axle, 35% gradeability, rugged all-terrain tires and available all-wheel drive, you'll be able to go off the slab and into the mud with the LE Series scissor lifts.

There are four models available with working heights up to 46 ft and a maximum platform capacity of 1,000 lb. All models will fit through standard double doorways to get you to and from the work site.

The efficient direct electric drive system gives you the muscle you'll need for demanding jobs; and, you'll get double the duty cycles of other electric scissors with the deep cycle batteries. Plus, the M models have the Multi-Power feature, which has an on-board diesel-powered generator with improved fuel efficiency for lower costs.

LE SERIES

Off-Slab Mobility

Full-time automatic traction control and an oscillating axle boost off-slab productivity.

Platform Extension

A standard feature, the platform extension has a 250 lb capacity.

JLG® Workstation in the Sky® Series
ACCESSORIES

Optional Workstation in the Sky® accessory packages are designed for the specific needs of electricians, plumbers, contractors and plant maintenance professionals.

Accessories that Extend Your Scissor Lift's Versatility.

Workstation in the Sky® accessory packages are designed to keep your tools and components within arm's reach. Choose from packages that feature a removable workstation that optimizes platform space with compartments for tools such as a reciprocating saw, drill, circular saw, battery charger and 6 in. x 6 in. component boxes. Plus, a pull-out tray is included to provide a flat working surface near the top of the rails.

Plumber's Package

Manufacturer-approved pipe racks provide positive retention of materials for plumbing contractors, while storage outside the platform helps prevent rail damage and optimizes space.

Electrician's Package

For electrical contractor applications that require battery-powered tools, the JLG® workstation keeps your tools within reach and off the floor of the platform. A stowable workbench and molded pockets provide ample storage while leaving the workspace open to get the job done. Electrician's Tree carries six 500 ft wire spools to speed up wire pulling and reduce friction associated with ground-based wire trees.

Plant Maintenance Package

The Plant Maintenance Package combines popular elements of the Electrician and Plumber packages to help plant maintenance professionals perform tasks, ranging from general repair to electrical and mechanical installation. In addition, a small welder powered by the machine batteries is included for light repairs.

JLG® Electric Powered Aerial Work Platforms SPECIFICATIONS

Main Features

- Best on-the-job performance—Double duty cycles for longer operating times, tight turning radius for maneuvering and positioning, and a rugged design.
- Narrow aisle models—Efficiently access hard-to-reach areas for more productive maintenance projects.
- Revolutionary new Workstation in the Sky® options and accessories.
